PROFESSIONAL PROFILE

Full Stack Developer and Business Process Analyst with a BSc in Computer Science and experience delivering commercial websites, enterprise web applications, ERP implementations, and automation initiatives. Build practical systems with **React, Python, FastAPI, PostgreSQL, and REST APIs**, while owning business requirements, cross-functional delivery, cloud deployment, and user adoption. Experienced turning complex, paper-based processes into integrated digital workflows.

TECHNICAL SKILLS

LANGUAGES Python, JavaScript, Java, C++, PHP, SQL, C# (training)

FRONTEND React, Next.js, HTML/CSS, Framer Motion, responsive interfaces

BACKEND & DATA FastAPI, Flask, Node.js, Express, REST APIs, PostgreSQL, MySQL, Tortoise ORM, JWT

CLOUD & TOOLS AWS (hands-on labs), Vercel, Render, Git/GitHub, Cloudflare, WordPress, Power Automate

AI & ENTERPRISE OpenAI API, LangChain, Hugging Face, AI workflow automation, Odoo ERP, data migration

PROFESSIONAL EXPERIENCE

RADIAN H.A. LIMITED | Business Process Analyst

April 2025 – Present • Software development, ERP & digital transformation

- Led delivery of **five previously stalled initiatives**, taking work from requirements and stakeholder alignment through implementation, testing, and adoption.
- Spearheaded an **organization-wide Odoo ERP rollout** across Sales, Rental, Inventory, Purchasing, Accounting, CRM, and related operations; coordinated migration and process redesign.
- Designed and developed a **Training Management System** using React, FastAPI, and PostgreSQL to support enquiries, enrollments, payment tracking, staff roles, and certificate administration.
- Designed a modular **security operations application** for guard handovers, incident reports, NFC/GPS checkpoints, patrol routes, and multi-site administration.
- Led corporate website redevelopment and developed a dedicated training website, including responsive UI, deployment, DNS, caching, and business content workflows.
- Translated finance, logistics, warehouse, training, and management requirements into software specifications; coordinated vendors and trained employees on systems and AI tools.
- Analyzed business strategies, operational performance, and existing workflows to identify process gaps, implementation risks, and opportunities for improved productivity and service delivery.
- Prepared findings, evaluated alternative approaches, and presented practical recommendations to management to support strategic planning, system investment, and operational decisions.

PYRAMID ENGINEERING LIMITED | Operations Coordinator

September 2024 – April 2025

- Monitored offshore crane operator performance against client KPIs and contract requirements; prepared structured reports for management and client review.
- Coordinated inspection schedules, maintenance follow-ups, and resolution of operational issues among operators, supervisors, and client representatives.
- Maintained daily operational checklists, incident reports, action logs, and supporting documentation to improve visibility and accountability.
- Developed an internal inventory-tracking system to improve stock visibility, material records, and stock management.
- Processed purchase orders, offshore payroll, and invoices; facilitated operator performance meetings and follow-up actions.

SELECTED ENGINEERING PROJECTS

TRAINING MANAGEMENT SYSTEM | Full-stack enterprise platform

React • Python / FastAPI • PostgreSQL • Tortoise ORM • JWT • Vercel / Render

Designed an end-to-end training operations platform spanning student enquiries, enrollment, payment plans, reminders, role-based administration, instructor access, and certificate management. Built a responsive frontend and API-backed relational data model; documented workflows for staff adoption.

SECURITY OPERATIONS & PATROL MANAGEMENT | Internal application

React • FastAPI • PostgreSQL • REST APIs • NFC / GPS workflow design

Developed a modular, multi-site system for digital guard handovers, incident reporting, communications, patrol schedules, and supervision. Designed customizable maps with zones, route drawing, checkpoint placement, and NFC/GPS verification workflows. Platform under active development.

ODOO ERP IMPLEMENTATION | Enterprise systems transformation

Odoo • ERP configuration • data migration • operational process architecture

Led ERP rollout and design of business workflows for quotations, rental dispatch and returns, inventory, purchasing, accounting, CRM, and reporting. Coordinated integration partners, system testing, staff training, and post-launch improvements.

COMMERCIAL WEBSITES & FREELANCE DEVELOPMENT

ABSCO ENTERPRISES LIMITED | Freelance web development

https://abscoltdtt.com/ • Commercial client delivery, responsive design, service presentation and enquiry pathways.

RADIAN H.A. LIMITED | Corporate website redevelopment

https://rhatt.com/ • Product and service discovery, business quotation pathways, CMS customization, hosting, DNS and performance optimization.

RADIAN TRAINING | Training & certification website

https://training.rhatt.com/ • Course discovery, enrollment pathways, training information and certificate verification access.

OTHER | Lumiere Lounge website; AI Image Generator (PHP / WordPress); Student Conduct Tracker (Python / Flask).

CERTIFICATES & PROFESSIONAL DEVELOPMENT

AWS: Cloud Practitioner Essentials (completion certificate); Cloud Practitioner SimuLearn training; AI Practitioner course and SimuLearn training.

Udemy: AI Engineer Agentic Track; AI Engineering Core Track; FastAPI Foundation.

Additional: freeCodeCamp C# certificate; Six Sigma White Belt certification.

EDUCATION

University of the West Indies, St. Augustine | BSc Computer Science (Special), Second Class Honours • 2021–2024
