

PIERCE DOMAN

FULLSTACK DEVELOPER / BUSINESS PROCESS ANALYST

#4 Sonata Drive, Harmony Hall, Marabella. Piercedoman25@gmail.com | 1-868-266-5568

SUMMARY

Business Process Analyst and Full Stack Developer with a Computer Science background, specializing in digital transformation, ERP implementation, and workflow automation. Proven ability to lead and deliver multiple cross-functional projects, including corporate website redevelopment and full-scale Odoo ERP implementation.

Rapidly progressed into leadership responsibilities, managing teams, coordinating development work, and driving key business initiatives from concept to delivery. Strong experience translating operational requirements into scalable technical systems and optimizing business processes for efficiency and accuracy.

Extensive hands-on experience implementing Odoo across accounting, sales, CRM, rental operations, and reporting, supported by strong full stack development skills.

Currently advancing into AI Engineering, with active experience using modern AI frameworks and tools to build automation and intelligent workflow solutions. Also experienced in training employees in AI adoption and automation practices to improve productivity.

PROFESSIONAL EXPERIENCE

Radian H.A. Limited - Business Process Analyst

Apr 2025 - Current

- Led and successfully delivered 5 previously stalled strategic projects, including corporate website redevelopment and full-scale Odoo ERP implementation.
- Managed internal development work and coordinated a small team to redesign and maintain the company website, including direct coding and deployment of multiple pages.
- Implemented and customized Odoo ERP, integrating Accounting, Sales, CRM, Rental Operations, and Reporting modules into a unified business system.
- Acted as liaison between management and external vendors to support execution of digital transformation initiatives.
- Translated complex operational requirements into structured system workflows, improving efficiency across multiple departments.
- Designed and optimized internal business processes, reducing manual workload and improving operational accuracy.
- Introduced AI and automation tools across the organization and trained employees on their use, improving workflow efficiency.
- Provided technical and strategic recommendations to improve business systems, data flow, and process structure.
- Developed strong cross-functional understanding of operations, finance, procurement, sales, and logistics through ERP implementation.
- Authored and published two books, and contributed to a third through content development, design, and publication support.

- Managed offshore crane operator performance tracking in compliance with client KPI and contract requirements.
- Coordinated inspection schedules, maintenance follow-ups, and operational reporting to improve issue resolution efficiency.
- Oversaw daily operational reporting including checklists, incident reports, and action logs to ensure transparency.
- Facilitated communication between operators, supervisors, and client representatives to resolve operational issues.
- Developed and maintained an internal inventory tracking system to improve stock visibility and management.
- Managed purchase orders, offshore payroll processing, and invoice preparation with high accuracy and timeliness.
- Conducted performance meetings with operators to improve compliance and operational efficiency.

EDUCATION

University Of The West Indies - St. Augustine - Second Class Honours

Sep 2021 - Sep 2024

- Bachelor of Science: Computer Science (Special)

Marabella North Secondary: Forms 6

Sep 2018 - 2020

- Passes in Pure Math, Physics, IT, Caribbean Studies and Communication Studies. Units 1 and 2

Marabella South Secondary: Forms 1-5

Sep 2013 - 2018

- Passes in Mathematics, English, Physics, Biology, Chemistry and IT

PROJECT SUMMARY

- Student Conduct Tracker (Final Year Project) — Built using Python and Flask; designed for tracking, reporting, and analyzing student conduct data.
- Platformer Game (Java) — Developed full game mechanics, UI, and gameplay systems.
- AI Image Generator Website (PHP / WordPress) — Built AI-powered image generation system integrated into a WordPress CMS.
- Freelance Web Development (Lumiere Lounge) — Delivered commercial website development project.

PROGRAMMING LANGUAGES

- **FRONTEND:** React, Next.js, HTML/CSS, Framer Motion
- **BACKEND:** Node.js, Express, Python, FastAPI, REST APIs, Java
- **AI / ML:** LangChain, OpenAI API, Hugging Face, Basic Machine Learning Workflows, AI Automation, Prompt Engineering
- **DATABASES:** SQL, MySQL (basic/working knowledge)
- **DEVOPS / TOOLS:** Git/GitHub, WordPress (Custom Development), Odoo (ERP Implementation & Customization), PowerShell, Power Automate
- **LANGUAGES:** JavaScript, Python, Java, C++, PHP, SQL

SKILLS

- Agile / Scrum Methodologies
- Process Optimization & Automation
- ERP System Implementation (Odoo)
- Full Stack Web Development
- Data & Workflow Management
- Business Process Improvement
- Team Coordination & Project Delivery
